Utility Pole Solutions purchases surplus steel utility poles and makes them available for immediate delivery.

We have an inventory of more than 8000 steel transmission and distribution poles in 8 pole storage yards across the U.S. This inventory enables us to engineer and deliver poles to your exact specifications in a matter of weeks. All poles are engineered in PLSpole by a PE. Typically our pole orders are delivered within 1 to 3 weeks.

Engineering Support

We're here to support our clients in defining the specifications for their steel poles. Our team can assist you in determining what is required in terms of loading, attachments, and foundation design.

We'll Purchase Your Surplus Steel Poles

Utility Pole Solutions is always searching for additional surplus steel poles to increase our nationwide inventory. We purchase surplus steel poles from utilities/contractors and work directly with Investment Recovery Departments of over 65 electric utilities.
